Dual-Track Professional Summary

Track 1 – Java & Enterprise Architecture (Core Expertise)

Senior Java Developer & Architect with 15 years of experience building large-scale enterprise banking systems. Proven expertise in Java, Spring Boot, microservices, FIX protocol, Spark, and Kafka, with hands-on experience at Deutsche Bank, HSBC, and Cognizant. Skilled in cloud-native platforms (AWS, GCP, Kubernetes, OpenShift), high-performance backend services, and financial trading systems. Adept at system modernization, cloud migration, and platform resilience.

Track 2 – AI/ML & Generative AI (Collaborative Contribution)

Contributed to AI/ML projects for the past 5 years, supporting predictive maintenance, IT automation, structured data transformation, and generative AI. Skilled with TensorFlow, PyTorch, Hugging Face, LangChain, and OpenAI APIs. Built solutions including HVAC predictive maintenance, LangChain-based JUnit test generation, and a Transformer-based data transformation engine (Structform). Partnered with ML teams to deploy scalable AI pipelines into production.

Core Skills

- Enterprise Systems: Java, Spring Boot, Microservices, FIX, FIXML, REST, SOAP
- Big Data & Streaming: Apache Spark, Kafka, Spark Structured Streaming
- Generative AI & ML: TensorFlow, PyTorch, Hugging Face, LangChain, OpenAI APIs
- Cloud & DevOps: AWS, GCP, Kubernetes, Docker, CoreML, Jenkins, OpenShift
- Specialization: Predictive Maintenance, Digital Twins, LLM fine-tuning, Transformers
- Databases: Oracle, PostgreSQL, MongoDB, BerkeleyDB

Key Projects

- HVAC Predictive Maintenance (Expleo) – Built ML-driven digital twin models for predictive maintenance, reducing downtime and improving energy efficiency.
- Generative AI Test Automation – Developed LangChain + Hugging Face pipeline for automated JUnit test case generation.
- Structform (Open Source) – Created Transformer-based structured data transformation engine with 99% validation accuracy and automated SQL correction.
- Sign Language Translation – Built a cross-attention Transformer model using PyTorch + BlazePose keypoints for ISL-to-English translation.

- HSBC Barracuda Trading Platform – Contributed to award-winning trading system integrating with MarkitWire, DTCC using FIXML; implemented clearing flows and DFA requirements.
- Deutsche Bank – Feed & Adjustment Workstation – Enhanced Java-based enterprise application with Hazelcast, MongoDB, Spring, REST APIs, handling new entity processing.

Experience Snapshot

AIML Cop Group – Senior Java Architect | AI/ML Collaborator (2020 – Present)

- Core role: Contributed in Generative AI projects to serve business users within Deutsche Bank
- AI/ML: Contributed to predictive maintenance, generative AI automation, structured data transformation, and deployment of ML pipelines.

Deutsche Bank – Associate Software Architect (2015 – 2020)

- Designed Java backend services for high-performance financial apps.
- Led cloud migration to Kubernetes/OpenShift, strengthened application security.

Cognizant Technology Solutions – Software Engineer (2013 – 2015)

- Built Position Management systems in Java/JPA/Oracle for global securities infrastructure.

HSBC GLT – Software Engineer (2011 – 2013)

- Contributed to Barracuda trading platform, integrating with DTCC, MarkitWire using FIXML.

High Mark Credit Information Services – Software Engineer (2010 – 2011)

- Developed Spring, Hibernate, Struts applications for credit services domain.

Education & Certifications

- PG Certification in Computational Data Science (CDS) – IISc Bangalore (2024)
- Associate Cloud Engineer Certification – 2023
- Diploma in Advanced Computing (DAC) – ACTS, Pune (2007)
- B.E. Electronics – Pune University, VIT College (2006)

Additional Information

Experience: 15+ years (Java & Architecture), 5 years (AI/ML collaboration)

Notice Period: 45 Days

Location: Pune (Onsite)
